business
an edge.

Control  Commercial Systems

Partner with the Proven Leader.

Whether you're looking to impress with state-of-the-art audio visual capabilities in the boardroom, deliver customers an unmatched entertainment experience, provide employees the benefits of a smart office, or simply manage operating expenses by controlling energy use in buildings, Control4 offers an affordable solution for virtually any automation and control requirement for your business.

Control4® Commercial Systems delivers affordable automation and control of lighting, shades, music, video, HVAC, security and energy management systems with secure, centralized system management. Your business can enjoy bottom-line benefits, your customers will be wowed by an impressive display of automation, and your team can control everything from a backend system console. This is why Control4 is the automation platform of choice for hotels, property managers and owners, restaurants and bars, universities and utilities.

Control4 has been delivering robust and affordable control solutions to the residential market since 2003. With over 1.2 million ZigBee® Pro devices shipped to date and more than 120,000 controllers deployed in the market, the Control4® platform has been widely adopted by consumers around the world. Now Control4 can offer affordable, flexible and easy-to-use control solutions to businesses like yours. Whether it's a system to support an expansive building with complex demands or a single conference room application, Control4 can help design a commercial-automation solution that delivers big impact for your business.

Why Control4?

Affordable – Control4 radically reduces the costs and complexity of installation, bringing affordable automation and control solutions to the commercial market.

Easy to Install – Control4 delivers both wired and wireless solutions for installation in new construction or retrofits of existing properties. Control4's extensive use of ZigBee® Pro technology reduces the need for new wiring, making it easier to finish the job much more quickly, while saving on additional wire, conduit and labor costs.

Easy to Use – Control4 makes life Everyday Easy™ with intuitive solutions that can be set based on pre-determined scheduled events, at the touch of a button. Or, set the system to respond to environmental and occupancy detection to maximize comfort and convenience, while minimizing energy and operational costs.

Flexible – Whether you want to control a single room or an entire business complex, control a single wall of TVs or coordinate lights and entertainment systems to perform in unison, Control4 is uniquely designed to scale to fit the needs of your business.

Get Control over Energy Use.

Control4 gives you the power to save energy without having to sacrifice the comfort of your customers or employees. By controlling air conditioning, heating and lighting alone, a company can reduce energy use and save big each month on costly utility bills.

Plus, Control4 can help qualify your building for Leadership in Energy and Environmental Design (LEED) Certification. And, with ZigBee® Pro wireless technology, your project won't require excessive conduit and wiring, which saves on costs; and by reducing the consumption of these materials, benefits the environment as well.

*Commercial Buildings Use
Approximately 66% of Electric
Energy in the United States.*

Energy represents as much as 30% of a building's operating expense. Control4 offers an unobtrusive way to conserve money and resources by managing lighting and HVAC systems in unoccupied spaces, pre-setting lights and temperature to the most energy-efficient levels and creating one-touch "green" settings.

An Award-Winning Product Line.

Commercial Controllers – The “brains” of the operation, commercial controllers provide the behind-the-scenes management over intelligent devices in the room or building.

Thermostats – Featuring bi-directional communication and seamless integration with the Control4® network, wireless thermostats add high-impact, climate control functions that can interact with every other intelligent device in the building and help drive significant energy savings.

Interfaces – Sleek touch screens, intuitive remotes, on-screen navigators, and simple keypads let you enjoy effortless control.

On-Screen: Using the Control4® System Remote Control, you can enjoy total control from any television.

Touch Screen: Control4 offers a variety of touch screens that provide complete control from units that can be mounted on the wall, set on a counter or table, or used as a portable device with a docking station.

System Remote Control: The Control4® System Remote Control SR-250 has a convenient OLED backlit display that provides list navigation and pre-set buttons for simple one-touch commands.

Keypads: Unlock the power of customizable, preset, one-touch control functionality with our elegant keypads.

Mobile: Provide secure access to system control from a variety of smart phone and tablet devices, including iPhones, iPads and Android.

Lighting Control – Control4® dimmers and switches easily replace existing light switches, or plug into outlets to offer complete control of lights and electronic equipment without construction hassles so you can reduce utility bills, extend bulb life, conserve natural resources, and experience the convenience of pre-determined, one-touch lighting scenes.

Audio/Video – A full line of amplifiers, tuners, audio switches and media players create a comprehensive entertainment experience that enables an important board meeting presentation, sets the stage in a lobby or showroom, or drives a video wall on game day.

System Management.

One of the most impressive features of a Control4® solution is also one that most people will never see: our web console management software. Designed to give you full, detailed control of your building from a central or remote location, the software is easy to learn and use. Our web console management software features:

- Business management system
- Web-based
- Manage local and remote properties
- Quick view of network devices, battery devices, maintenance items and updates
- Service alerts
- Scheduled event management

Broad Integration

By seamlessly interacting with your business systems and networks, and enabling communication between electronic devices from virtually any manufacturer, Control4 makes it easy to implement simple or complex control systems.

Control4 works with hundreds of the largest consumer electronics and product manufacturers in the world and supports thousands of products to create a robust, integrated ecosystem that supports your business needs. Whether you want automated shades, a powerful AV system or a green solution, Control4 connects all the disparate devices into one cohesive, easy-to-use control system.

\$8.5 Billion Las Vegas CityCenter Banks on Control4.

– CEPro

Proven Technology.

World's Largest IP Control System

Over the years, Control4 has been delivering proven technology to the commercial market, successfully automating bars, restaurants, sports venues, and boardrooms.

In 2009, Control4 harnessed the power of the ZigBee® Pro mesh network with the launch of the MGM CityCenter in Las Vegas – the world's largest installed IP control system to date.

MGM CityCenter Las Vegas

- 6 properties on 76 acres on the Las Vegas strip
- Over 6,000 hotel rooms and condos
- Largest private IP network
- Wireless computer access covering more than 14 million square feet
- Over 85,000 ZigBee® Pro devices
- Over 20,000 IP devices
- More than 6,500 antennas and 3,000 wireless access points

Solutions Built for You.

Control4's Commercial System solutions are uniquely modular, which means you can start with one feature like energy management and then add other capabilities when you're ready. Start with a primary conference room or showroom and add control to the rest of the building later, as your budget permits.

A Scalable Solution

Control4® products are developed to work on standards-based communication protocols. Unlike other companies that use a proprietary platform, the Control4® system adheres to IEEE (Institute of Electrical & Electronics Engineers) standards. If you want to add to or change features in your system, it's easy. Control4 also leverages ZigBee® Pro mesh technology, the standard adopted by utilities for smart grid deployments and the world's leading consumer electronics companies and appliance brands.

Standards Based

- Ethernet/IEEE 802.3
- WiFi/IEEE 802.11.b or IEEE 802.11.g
- ZigBee® Pro/IEEE 802.15.4

Ideal for Retrofitting Existing Buildings

The Control4® platform is the ideal solution for both new construction and the retrofitting of existing buildings, which is especially important for properties that must adhere to historical building restrictions. ZigBee® Pro wireless technology drives costs down and eliminates the need for major demolition during projects. This reduces construction downtime, so you can get your business up and running in no time.

Give Your Business an Edge.

With Control4® Commercial Systems you can deliver an enhanced customer experience, enjoy material operating efficiencies, reduce energy use, and when combined, realize substantial return on your automation investment. Businesses that have adopted Control4 are impressed that it delivers robust, custom automation solutions that are easy to install, manage and fit within their budgets. With Control4, everything's better when it all works together.
