

Control  MARINE SOLUTIONS

Control Where You Need It

Powerful, affordable, easy-to-use home-control solutions are synonymous with Control4. People worldwide trust Control4 to manage and integrate all the electronics and technology in their homes so everything works together seamlessly. But what about your second home on the sea?

Control4 helps everything on your yacht work better by making it work together. But its solutions are flexible and scalable, allowing you to control what features and options suit you best.

Control4 has developed easy-to-use technology that centralizes your yacht's onboard systems, allowing you to manage everything from a single interface both onboard and remotely. Control4 has partnered with some of the biggest names in the electronics industry, so you can rest assured that one solution will provide you with unsurpassed entertainment, comfort and convenience and peace of mind.

Control4 can help you control virtually every gadget on your yacht, effortlessly. By integrating all the electronic features aboard your vessel, like audio, lighting, entertainment and temperature, Control4 makes life on deck Everyday Easy®.

Enhancing Your Lifestyle

Control4 helps everything on your yacht work better by making it work together. Our solutions are flexible and scalable, allowing you to determine the control features and options that best suit your lifestyle. Control4's marine solutions are about enhancing your routines and lifestyle.

Visual Appeal

To enhance the beauty and safety of your vessel, Control4 can automate your exterior running lights, allowing guests and crew to move around your yacht comfortably. Automation options range from triggering lights based on detected light levels to specific times of day. Control4 can also control your interior lights, dimming lights in certain rooms while brightening others so each room is just right.

Control4 can open and close blinds automatically and direct the thermostat when to go up or down to ensure comfort in the interior cabins. As the sun sets or skies become cloudy, the blinds can open, allowing for more natural light.

Entertaining on Board

Whether you're entertaining a large group or want to set the mood for two, Control4 helps make your yacht the ideal setting. With Control4 you can dim the lights, easily create custom playlists so you can play the perfect mood music, choose movies easily from their cover art, and control your televisions and game systems. Space is at a premium on a yacht. By having Control4 centralize your audio and video collections, you'll maximize your enter-

tainment options in the least amount of space and allow for vessel-wide media access. Plus Control4 lets you create multiple audio zones so you can have different music playing on deck than you do in the master suite. Control4 delivers customized entertainment when and where you want it.

Staying Green

Most people would like to be as green at sea as they are at home, saving energy without sacrificing everyday conveniences. However, most yachts don't come equipped with features that improve energy efficiency across all systems. For example,

Control4 makes it easy to be green by helping you create energy efficient levels with every aspect of your yacht.

you may have a programmable thermostat, but if you've left the window shades open to direct sunlight, your HVAC system is working harder than it needs to.

Control4 makes it easy to be green by helping you create energy efficient levels with every aspect of your yacht, from your lighting to your heating. Plus, with Control4, you can turn any light into a dimmer. Dimming a light even 10% can cut your energy usage by 10% and double the life of the bulb. Small tweaks like this can make a big difference, improving your overall energy efficiency without detracting from your onboard experience.

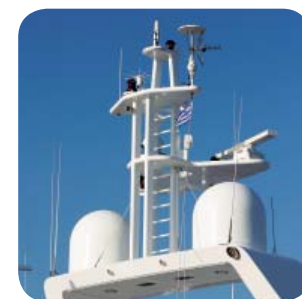

It's easy to find exactly what you want to control—from lighting to your entertainment system—because Control4 uses intuitive navigation.

Relaxation and Ease

Using Control4 to manage all the gadgets on your yacht is like being on autopilot. Control4 takes the work out of technology and leaves you with all the enjoyment. Plus Control4 has mastered yacht automation that is both cutting edge and easy to use. It's easy to find exactly what you want to control—from your lighting to your entertainment system—because Control4 uses intuitive navigation from remotes, touch-screens, keypads, iPhones, or iPod Touches. It's so easy to use that your guests and crew will be able to use the system without any tech training. Even controlling your yacht from a remote location online is a cinch because it all uses the same, easy-to-use interface. Control4 will allow you the kind of real relaxation you deserve at sea.

Yacht Safety

The same easy-to-use interface that lets you control your lighting and entertainment system also lets you control IP cameras, security systems, and other safety features to keep your yacht nice and safe. Control4 seamlessly integrates with your onboard security features, and even allows you to control and keep an eye on your vessel while you're away. Plus with Control4, a single button can set everything on your yacht to "off." No more making rounds from bow to stern checking and double checking all the electronics to make sure you got everything. Control4 makes it easy to go ashore and leave your yacht safe and secure. Plus you can log into your yacht controls from a secured server to check in on your yacht. And even turn on key lights and heating or air conditioning before you arrive to make sure everything's ready for you.

Allowing Control4 to make life on the sea Everyday Easy® is not as hard as you might think. Installation is one of the biggest hurdles to implementing automation, but Control4's leading edge and flexible solutions let you experience full yacht-control quickly. Control4 weaves gracefully into your current systems and makes them all operate more smoothly.

Installation

By offering a wireless system option, Control4 can be easily added to your yacht with little to no bodywork. In a matter of days, if not hours, you can experience firsthand the Control4 difference. But you aren't sacrificing customization for simplicity. Control4 simply does a better job of putting all the pieces together by working with the gear you have to create a system that reflects your wants and needs.

Seamless Integration

Enjoying the full, seamless, Everyday Easy® control over your yacht doesn't require all new technology. Control4's innovative and flexible platform has attracted the attention of some of the biggest names in the electronics industry to make sure that all of your stuff works together flawlessly.

Scalability

One of the most unique things about Control4 is its flexibility. You can start small by going with a basic system and build onto your system as money and time allows. The Control4 system works like a series of building blocks. You only pay for the blocks you want when you're ready. Unlike other home automation systems, Control4 is not a one-package-fits-all kind of system. With this many options, Control4 puts the control in your hands, where it belongs.

Implementation On Board

The Control4 system works like a series of building blocks. You only pay for the blocks you want when you're ready.
